Επιχειρήσατε πρόσβαση σε ιστότοπο μέσω του οποίου παρέχονται μη αδειοδοτημένες υπηρεσίες τυχερών παιγνίων.

Σύμφωνα με τον νόμο, οι πάροχοι υπηρεσιών διαδικτύου είναι υποχρεωμένοι να μην επιτρέπουν την πρόσβαση σε ιστότοπους μη αδειοδοτημένων παρόχων τυχερών παιγνίων, οι οποίοι αναφέρονται στον οικείο κατάλογο (Blacklist) που τηρεί η Ε.Ε.Ε.Π.

Επισημαίνεται ότι η συμμετοχή σε τυχερά παιγνία, τα οποία διοργανώνονται χωρίς άδεια από την Ελληνική Δημοκρατία, επισημαίνεται αυστηρές διακινήσεις και ποινικές κυρώσεις.

INTERNET SEHAT
powered by IM2 netSafe

TRUST POSITIF

Based on Regulation of the Minister of Communication and Information No. 19 of 2014
● It’s harder to notice the blocking of less popular sites & services

● Internet censorship often differs from network to network within a country

● Most censorship techniques are quite subtle

● Cases of over-blocking and collateral damage

● The fact that a site or service is inaccessible doesn’t necessarily mean that it’s blocked by your Internet Service Provider (ISP)

Why measure internet censorship?
Free software project aimed at empowering decentralized efforts in increasing transparency of internet censorship around the world.

Since 2012, the OONI community has collected millions of network measurements from more than 200 countries, shedding light on many cases of internet censorship around the world.

OONI Probe desktop app

https://ooni.org/install/desktop
- **OONI Probe is not a privacy tool.** Anyone monitoring your internet activity (e.g. ISP) will know that you are running OONI Probe.
- Types of tested URLs include provocative or objectionable sites (e.g. pornography).
- By default, OONI measurements are openly published.

Thematic OONI Probe testing

Social media, news websites, and VPNs often get blocked during political events (such as elections or protests) around the world.

To support rapid response to emergent censorship events, we share the following OONI Run buttons to enable the testing of specific types of websites.

1. Install the OONI Probe mobile app: Android, iOS, F-Droid

2. Tap the buttons below & open them with your OONI Probe mobile app (not with a browser)

3. Tap Run

Note: These tests require turning off VPNs.

SOCIAL MEDIA (39 URLs) | NEWS MEDIA (47 URLs) | VPNS (21 URLs) | WIKIPEDIA (28 URLs)
HUMAN RIGHTS (27 URLs) | ENVIRONMENT (20 URL) | LGBTQI (26 URLs) | LGBTQI (600 URLs)
REPRODUCTION RIGHTS (4 URLs) | COVID-19 (25 URLs)
Uncover evidence of internet censorship worldwide

Open data collated by the global OONI community

280,114 Measurements
233 Countries
17.9k Entities

OONI Explorer is an open data resource on internet censorship around the world, collating billions of network measurements collated from more than 280 countries since 2013. OONI Explorer sheds light on internet censorship and other forms of network interference worldwide.

Highlights

Network measurements collected from more than 280 countries
OONI Explorer is updated with new measurements

Search

Dig through OONI measurements with a powerful search tool, filter results into measurements that present network anomalies by country, network, and date range.

https://explorer.ooni.org/
- **Normal.** When everything is OK (e.g. tested website is accessible).

- **Anomalous.** Signal that something is wrong (we should check the measurement data more carefully). Anomalous measurements MIGHT contain evidence of censorship, but not necessarily (i.e. false positives).

- **Confirmed blocked.** We only confirm the blocking of a website when we detect a block page.

Interpreting the data
Example block page (from Indonesia)

Welcome to the OONI API

Dynamically updated every day, the OONI API enables researchers and data scientists to analyze all data collected from OONI Probes around the world.

Download and search OONI Probe network measurements.

As the OONI API is not designed for batch consumption of OONI data, please use it for a modest request rate. If you are interested in analyzing OONI data in batch, please look into setting up an OONI PostgreSQL MetaDB instance or fetching the whole OONI dataset from the ooni-data Amazon S3 bucket. If in doubt contact the OONI team.

READ THE API DOCS
- OONI PostgreSQL Metadb
- ooni-data Amazon S3 bucket
• Evidence of censorship events
• Transparency of information controls
• Allows researchers to conduct independent studies & to explore other research questions
• Allows the public to verify OONI findings
• Archive the Internet

https://ooni.org/data/
- **Burundi.** Social media blocked amid 2020 general election.
- **Venezuela.** Blocking of Wikipedia & social media amid presidential crisis.
- **Zimbabwe.** Social media blocked amid 2019 fuel protests.
- **Iran.** Blocking of Telegram, Instagram, and Tor during 2018 anti-government protests.
- **Spain.** Blocking of sites related to the Catalan referendum.

https://ooni.org/reports/

**Politically-motivated cases**
- **Malaysia.** Blocking of media websites reporting on the 1MDB scandal.
- **Egypt.** Hundreds of media websites blocked.
- **Myanmar.** “Fake news” websites blocked amid COVID-19 pandemic.
- **Indonesia.** Blocking of LGBTQI sites.
- **Iran.** Blocking of women’s rights sites, Kurdish sites, LGBTQI sites, Baha’i sites.
- **Pakistan.** Blocking of Baluch and Hazara sites.
- **Nigeria.** Blocking of Biafra sites.
• **Ethiopia.** Used to block numerous media websites, political opposition sites, and circumvention tool sites => Most were unblocked in 2018 as part of political reforms => But access to social media was blocked again in 2019.

• **Cuba.** Used to primarily serve blank block pages, only blocking the HTTP version of websites. Now they censor access to sites that support HTTPS by means of IP blocking.
