Investigate Internet Censorship

Open Data on Internet Censorship Worldwide from 2012 to Date
Investigate Internet Censorship

What is OONI Explorer?

OONI Explorer is the world’s largest open dataset on Internet censorship.

Since 2012, more than a billion network measurements from more than 241 countries and territories have been published on OONI Explorer.

Search tool

Use OONI Explorer to find data on:

- **Blocking of websites**
- **Blocking of instant messaging apps** (e.g. WhatsApp)
- **Testing of circumvention tools** (e.g. Psiphon VPN)

...and more!

Measurement Aggregation Toolkit (MAT)

Track Internet censorship worldwide and create charts based on real-time OONI data collected from around the world.
