Measure Internet Censorship

Detect the Blocking of Websites and Apps in Your Country
In real-time, your OONI Probe test results are published as open data. This data will support human rights advocacy efforts defending your digital rights.

**Did you know?**

Governments **blocked social media** (e.g. WhatsApp) during elections in Uganda, Tanzania, Mali, Benin, Togo, Burundi, Zambia, and many other countries in recent years.

**What you can do?**

1. **Run OONI Probe** on Mobile or Desktop.
   
   ! Scan to Install OONI Probe →

2. **Enable Automated testing** in the OONI Probe settings to contribute results every day!

**Contribute evidence of Internet censorship**

In real-time, your OONI Probe test results are published as open data.

This data will **support human rights advocacy efforts** defending your digital rights.

**Heads-up!**

Please **turn your VPN off** when running OONI Probe to help ensure more accurate test results.

Running OONI Probe can **potentially be risky** in certain countries.
